BUSINESS ANALYST

Computer Science Engineering student aspiring to become a Business Analyst, with hands-on experience in SQL, Excel, Python, data analysis, EDA and data visualization. Strong foundation in requirements analysis, business process analysis, KPI analysis and data-driven decision-making. Experienced in analyzing real-world datasets and developing dashboards and reports to communicate actionable insights.

TECHNICAL SKILLS

Business Analysis: Requirements Gathering, Requirements Analysis, Business Process Analysis, KPI Analysis, Data-Driven Decision Making

BA Documentation: BRD, FRD, User Stories, Use Cases, Acceptance Criteria

Data Analytics : SQL, Excel, EDA, Data Cleaning, Data Visualization, Tableau

Programming : Python, Pandas, NumPy, Matplotlib, SQLite

BI & Visualization : Power BI, Tableau, Streamlit

Methodologies & Tools: Agile, Scrum, SDLC, Jira, Git, GitHub

EXPERIENCE

Data Science Intern Dec 2025 – Present
White & Box Tech Products and Services *HSR Layout, Bengaluru*

- Analyzed real-world datasets using Python, Pandas, and NumPy to identify patterns, trends, and actionable insights.
- Performed data cleaning and exploratory analysis to support data-driven decision-making.
- Created data visualizations to communicate analytical findings and business-relevant insights.

EDUCATION

Er. Perumal Manimekalai College of Engineering Hosur, Tamil Nadu, India
Bachelor of Engineering in Computer Science and Engineering ***(CGPA: 8.3/10)*** *Aug 2023 – May 2027*

PROJECTS

MailSentryInsight *Python, SQL, Pandas, Streamlit, Plotly* GitHub

- Developed an email analytics dashboard to analyze email patterns, categories, and trends for data-driven insights.
- Implemented data classification and interactive visualizations to support analytical decision-making.
- Automated CSV, Excel, and PDF reporting for efficient analysis and business reporting.

AI-Powered Driver Safety System *Python, Machine Learning, IoT* GitHub

- Developed a data-driven driver safety system using **sensor, GPS, and BLE data** to detect driver fatigue
- Designed real-time alert functionality based on analyzed sensor conditions to support **timely decision making**

Deepfake Detection App *Python, Machine Learning, TensorFlow* GitHub

- Developed an AI-based application to analyze digital media and identify potential **deepfake content**
- Applied machine learning techniques to support **automated content analysis and detection**
